DETAILED ACTION

Examiner called Applicant's Representative Lindsay Scott F. for the case's Election/Restrictions, and has not yet received the response.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, 27-31, drawn to manipulating data structure (e.g., compression, compaction, compilation), classified in class 707, subclass 101.
 - II. Claims 18-23, drawn to application of database or data structure (e.g., distributed, multimedia, image), classified in class 707, subclass 104.1.
 - III. Claims 24-26, drawn to generating database or data structure (e.g., via user interface), classified in class 707, subclass 102.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the respective

Art Unit: 2167

inventions has a separate utility other than with the other invention. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for group I, is not required for the other group(s), restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined, with or without traverse.
